Kohlberg's Theory of Moral Development

Individuals move through the following stages:

- I. concern about obedience,
- II. satisfaction of needs and wants,
- III. concern with conformity,
- IV. concern with preserving society,
- V. concern with what is right beyond legalities,
- VI. concern with universal ethical principles.

Premoral Level

Stage 1: Punishment-Avoidance and Obedience	Make moral decisions strictly on the basis of self-interests. Disobey rules if can do so without getting caught.
Stage 2: Exchange of favors	Recognize that others have needs, but make satisfaction of own needs a higher priority.

Conventional Level

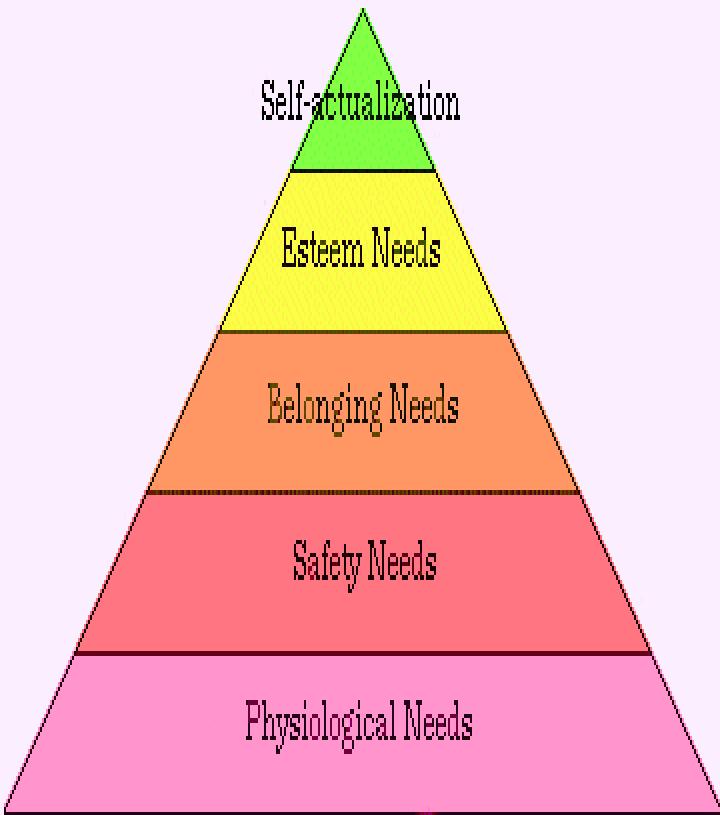

Stage 3: Good boy/Good girl	Make decisions on the basis of what will please others. Concerned about maintaining interpersonal relations.
Stage 4: Law and order	Look to society as a whole for guidelines about behavior. Think of rules as inflexible, unchangeable.

Principled Level

Stage 5: Social contract	Recognize that rules are social agreements that can be changed when necessary.
Stage 6: Universal ethical principle	Adhere to a small number of abstract principles that transcend specific, concrete rules. Answer to an inner conscience.

Kohlberg's individual moral developmental stages (1976)

Transcendence

250kt 2010

Maslow Need-hierarchy

rudyanto@unika.ac.id

Stage 6:

Embraces a set of universal and self chosen ethics. The law is based on such ethics and should therefore be followed.

Stage 5:

Principled level

Recognizes differing but equal moral values, holding certain principles as non relative in the interest of fulfilling a kind of social contract.

Stage 4:

Concern for social order. Laws are seen as agreed upon duties that should be followed for the social good.

Stage 3:

Called the "Good girl/good boy" stage; reflects a concern for the opinions of others.

Stage 2:

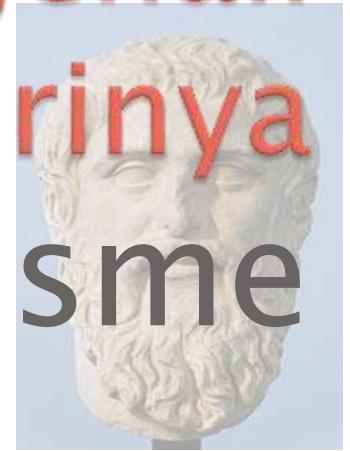

Right and wrong established by how they benefit the parties involved. "Fair" equals good.

Stage 1:

Identification of "bad" acts and those are "against the law," as prohibited by external punishments.

Existensialisme

Existentialisme

Sartre, Kierkegaard, Gabriel Marcel

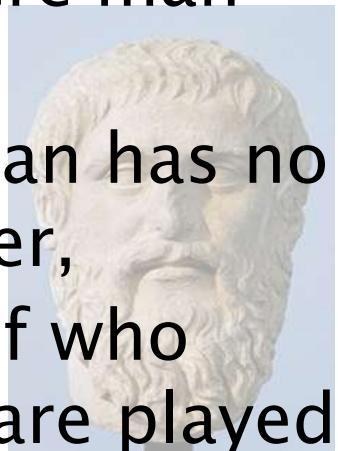

- ▶ Existentialism generally postulates that the absence of a transcendent force (such as God) means that
- ▶ **the individual is entirely free**, and,
- ▶ **therefore, ultimately responsible.**
- ▶ It is up to humans to create an ethos of personal responsibility outside of any branded belief system.
- ▶ That personal articulation of being is the only way to rise above humanity's absurd condition (suffering and death, and the finality of the individual).

Sartrean existentialism

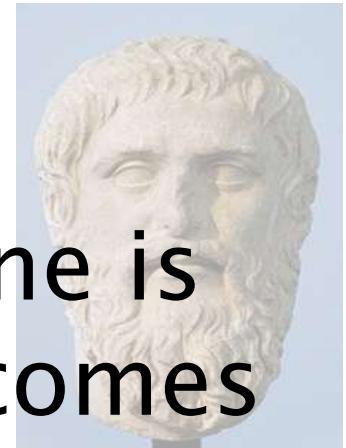

Existence precedes essence

- ▶ This is a reversal of the Aristotlean premise that essence precedes existence, where man exists to fulfill some purpose.
- ▶ Sartrean existentialism argues that man has no predefined purpose or meaning; rather,
- ▶ humans define themselves in terms of who they become as their individual lives are played out in response to the challenges posed by existence in the world

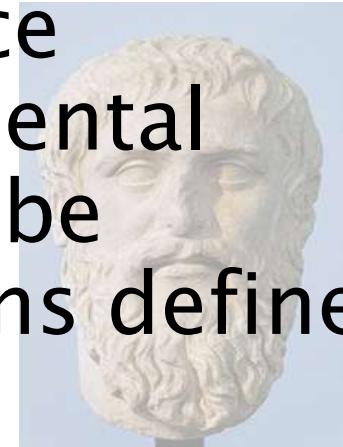

feminist existentialism

- ▶ Simone de Beauvoir uses this concept in her feminist existentialism
- ▶ to develop the idea that "one is not born a woman, but becomes one

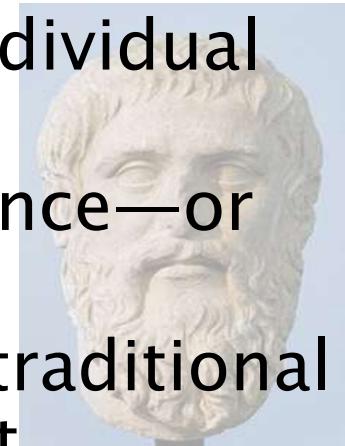

Existence precedes essence

- ▶ A central proposition of existentialism is that existence precedes essence; that is,
- ▶ that a human being's existence precedes and is more fundamental than any meaning which may be ascribed to human life: humans define their own reality.
- ▶ One is not bound to the generalities and *apriori* definitions of what "being human" connotes.

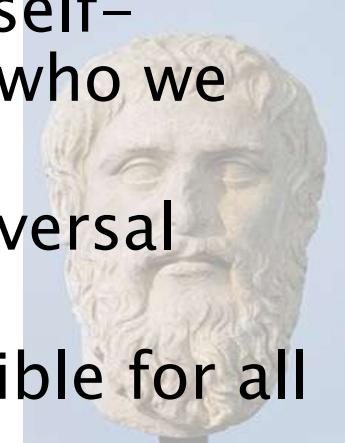

- ▶ "Existence precedes essence", is a philosophic concept based on the idea of existence without essence.
- ▶ For humanity, it means that humanity may exist, but humanity's existence does not mean anything at least at the beginning.
- ▶ This concept can be applied at the individual level as well.
- ▶ The value and meaning of this existence—or essence—is created only later.
- ▶ It directly and strongly rejects many traditional beliefs including religious beliefs that humankind is
- ▶ given a knowable purpose by its creator or other deity.

Condemned to be free , Responsibility for choices

- ▶ For Sartre, we must come into existence first,
- ▶ and then create our own essence out of interaction with our surroundings and ourselves.
- ▶ With this comes serious implications of self-responsibility over who we become and who we are.
- ▶ There is no longer, for Sartre, some universal "human nature".
- ▶ The individual consciousness is responsible for all the choices it makes, regardless of the consequences.
- ▶ Condemned to be free because man's actions and choices are his and his alone, he is *condemned* to be responsible for his free choices.

Deontologis

normative ethics+≡

E.T.H.I.C.S.

- normative ethics,
- deontology which emphasizes duty to rules and
- consequentialism which derives rightness or wrongness from the outcome of the act itself

Etika :

- Etika Deontologis (kewajiban) :
 - Nilai baik-buruknya suatu perbuatan dari perbuatannya & aturannya sendiri
- Etika teleologis :
 - Nilai baik-buruknya suatu perbuatan dari akibat2 yg ditimbulkannya

deontological ethics

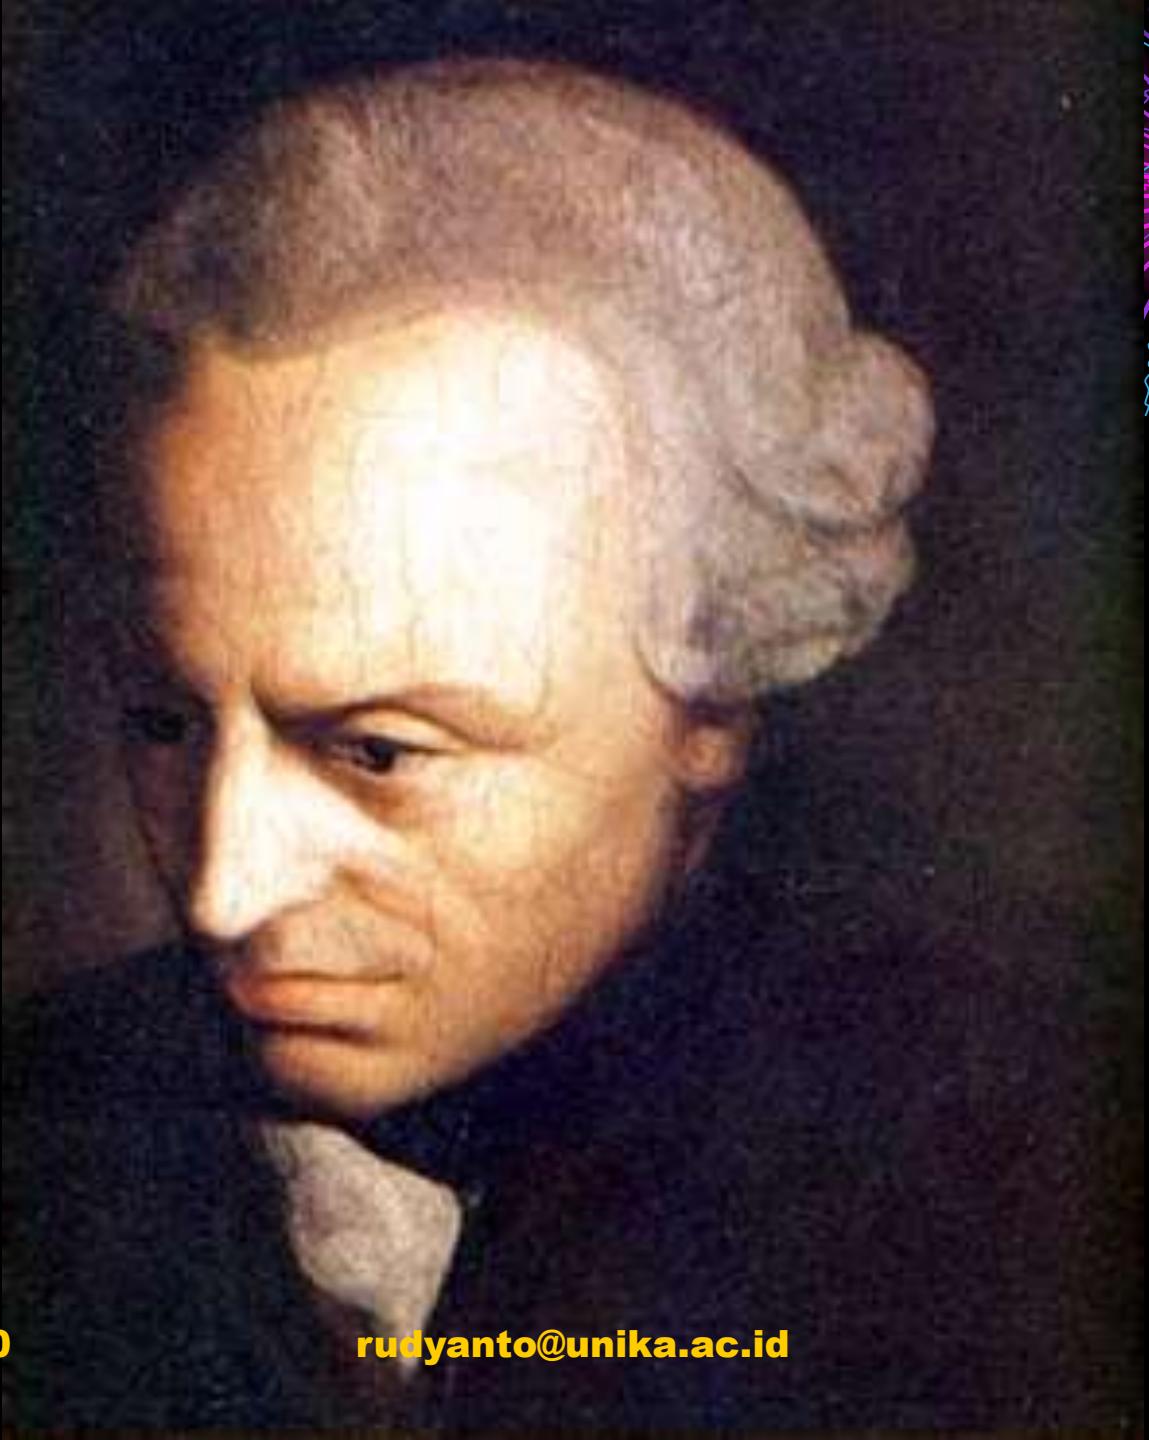

- deontological ethics, ethical theories that place special emphasis on the relationship between duty and the morality of human actions.
- Deontology (Greek *deon*, “duty,” and *logos*, “science”) consequently focuses on logic and ethics. No attempt is made in such theories to explicate specific moral obligations.
- In deontological ethics an action is considered morally good because of some characteristic of the action itself, not because the product of the action is good. Deontological ethics holds that at least some acts are morally obligatory regardless of their consequences for human welfare.

teleological ethics,

- **(teleological from Greek telos, “end”; logos, “science”), theory of morality that derives duty or moral obligation from what is good or desirable as an end to be achieved.**
- **Also known as consequentialist ethics, it is opposed to deontological ethics (from the Greek deon, “duty”), which holds that the basic standards for an action’s being morally right are independent of the good or evil generated.**
- **Modern ethics, since the 18th-century German deontological philosophy of Immanuel Kant, has been deeply divided between a form of**
 - **teleological ethics (utilitarianism) and**
 - **deontological theories.**

Virtue ethics

- emphasizes the role of one's character and the virtues that one's character embodies for determining or evaluating ethical behavior.
- Virtue ethics is one of the three major approaches to normative ethics, often contrasted to deontology which emphasizes duty to rules and consequentialism which derives rightness or wrongness from the outcome of the act itself.

Liberalism

- ideas and theories of government that consider **individual liberty** to be the most important political goal.
- Liberalism has its roots in the Western Age of Enlightenment.
- Broadly speaking, liberalism emphasizes individual rights and equality of opportunity.

Principles of Liberalism

- extensive freedom of thought and speech,
- limitations on the power of governments,
- the rule of law,
- the free exchange of ideas,
- a market or mixed economy, and
- a transparent system of government

HEDONISME

- Hedonisme (Yunani: hedone = nikmat, kesenangan): apa yang baik dilakukan manusia supaya bahagia adalah mencari kenikmatan dan kesenangan sebanyak mungkin, dan hindari penderitaan dan ketidakkenakan.
- Kesenangannya bersifat badani, aktual, dan individual. Tapi harus ada pengendalian diri (Aristippos 433 – 355 Sb M)

hedonisme

- Epikuros (341 – 270 Sb M): kesenangan adalah tujuan hidup manusia, tapi lebih dari sekedar badani dan aktual.

Macam keinginan:

- keinginan alamiah yang perlu (makan)
- keinginan alamiah yang tidak perlu (makan enak)
- keinginan yang sia-sia (kekayaan)

Hedonism

- (ethics) *The belief that pleasure or happiness is the highest good in life.*
- *Some hedonists, such as the Epicureans, have insisted that pleasure of the entire mind,*
- *not just pleasure of the senses, is the highest good.*

Nihilism

- the belief that all values are baseless and that nothing can be known or communicated.
- It is often associated with extreme pessimism and a radical skepticism that condemns existence.
- A true **nihilist** would believe in nothing, have no loyalties, and no purpose other than, perhaps, an impulse to destroy.

Moral nihilism

- (also known as ethical **nihilism**) is the meta-ethical view that nothing is intrinsically **moral** or immoral.
- For example, a **moral nihilist** would say that killing someone, for whatever reason, is neither inherently right nor inherently wrong.

EUDEMONISME

- Eudemonisme (eudaimonia = kebahagiaan). Kebahagiaan merupakan tujuan akhir dari kehidupan manusia. Kapan atau dalam hal apa manusia mencapai kebahagiaan ?
- Aristoteles (384 – 322): manusia akan mencapai kebahagiaan jika menjalankan fungsinya sebagai manusia dengan baik.

eudemonisme

Fungsi khas manusia: RASIO.

Jadi manusia akan bahagia (baik) apabila selalu mengadakan pilihan-pilihan rasional yang tepat dalam seluruh perbuatan-perbuatannya dan mencapai keunggulan penalaran intelektual.

UTILITARISME

- Utilitarisme (utility = manfaat). Teori: suatu tindakan adalah baik apabila mendatangkan akibat baik yang sebesar mungkin dan akibat buruk sekecil mungkin. Akibat baik itu bermanfaat bagi sebanyak mungkin orang yang bisa terkena oleh tindakan itu.
- Jeremy Bentham (1748 – 1832): “the greatest happiness of the greatest number” (kebahagiaan terbesar dari jumlah orang terbanyak).

DEONTOLOGI

- Deontologi (deon = kewajiban, apa yang harus dilakukan) menekankan kewajiban manusia untuk bertindak secara baik. Tindakan itu baik sejauh tindakan itu merupakan kewajiban.
- Untuk membedakan dengan tindakan legal, moralitas deontologi menuntut adanya kemauan baik.

Neuromarketing

Neuromarketing

- is a new field of marketing research that studies consumers' sensorimotor, cognitive, and affective responses to marketing stimuli.

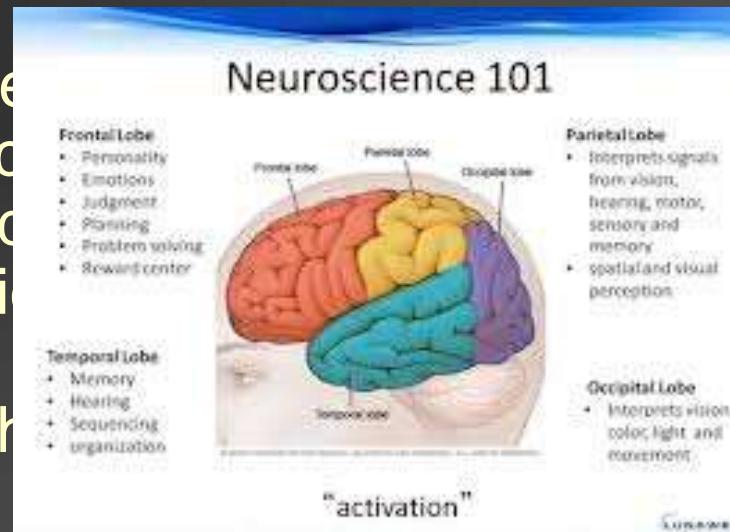

Neuromarketing

- Researchers use technologies such as functional magnetic resonance imaging (fMRI) to measure changes in activity in parts of the brain, electroencephalography (EEG) and Steady state topography (SST) to measure activity in specific regional spectra of the brain response

Neruro science

- , and/or sensors to measure changes in one's physiological state also known as biometrics including (heart rate and respiratory rate, galvanic skin response) to learn why consumers make the decisions they do, and what part of the brain is telling them to do it.

Neuromarketing

- Neuromarketing research raised interest for both academic and business side. In fact, certain companies, particularly those with large-scale goals, have invested in their own laboratories, science personnel and / or partnerships with academia.
 - The word "neuromarketing" was coined by Ale Smidts in 2002
-

- Companies such as Google, CBS, and Frito-Lay amongst others have used neuromarketing research services to measure consumer thoughts on their advertisements or products.

PRINSIP-PRINSIP ETIKA DASAR

- **Sikap baik:** mendasari semua tindakan kita dan dalam berhubungan dengan siapapun
- **Sikap adil:** memberikan kepada siapa saja apa yang menjadi haknya
- **Sikap jujur:** mengatakan sesuatu apa adanya
- **Hormat terhadap diri sendiri:** manusia wajib untuk selalu memperlakukan diri sebagai sesuatu yang bernilai pada dirinya sendiri.

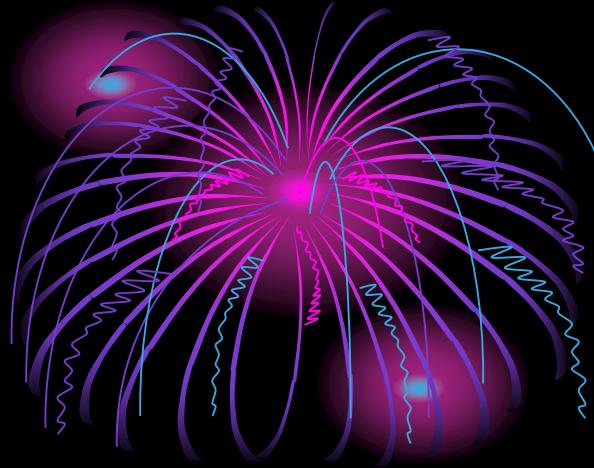

Prinsip yang paling dasar:

HUMAN DIGNITY

HOMO ECONOMICUS

A. Rudyanto Soesilo

HOMO ECONOMICUS

- or economic human, is the concept in many economic theories of humans as rational and narrowly self-interested actors who have the ability to make judgments toward their subjectively defined ends.
- Using these rational assessments, homo economicus attempts to maximize utility as a consumer and economic profit as a producer.

- This theory stands in contrast to the concept of homo reciprocans, which states that human beings are primarily motivated by the desire to be cooperative and to improve their environment.

- “an arbitrary definition of man, as a being who inevitably does that by which he may obtain the greatest amount of necessaries, conveniences, and luxuries,
- with the smallest quantity of labour and physical self-denial with which they can be obtained.”

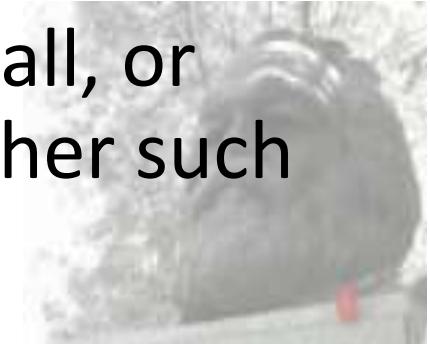

Aristotle's Politics

discussed the nature of self-interest in Book II, Part V

- "Again, how immeasurably greater is the pleasure, when a man feels a thing to be his own; for surely the love of self is a feeling implanted by nature and not given in vain, although selfishness is rightly censured;
- this is not the mere love of self, but the love of self in excess,
- like the miser's love of money; for all, or almost all, **men love money** and other such objects in a measure.

NICCOLO MACHIAVELLI

NICCOLO MACHIAVELLI (1512 -1519)

- Tipe Kerajaan & cara menegakkannya
- Penaklukan dan bagaimana memerintahnya
- Perebutan wilayah2 baru
- Berkuasa dng cara kekejaman
- Organisasi militer dan ketentaraan
- Lebih baik dicintai atau ditakuti? Sikap kejam atau belas kasih
- Tindakan supaya tetap disegani

TO RETAIN POWER

- To retain power, the prince must carefully maintain the sociopolitical institutions to which the people are accustomed;
- whereas a new prince has the more difficult task in ruling,
- since he must first stabilize his newfound power in order to build an enduring political structure.

PUBLIC AND PRIVATE MORALITY

- He asserted that social benefits of stability and security could be achieved in the face of moral corruption.
- Aside from that, Machiavelli believed that public and private morality had to be understood as two different things in order to rule well.

- As a result, a ruler must be concerned not only with reputation,
- but also positively willing to act immorally at the right times.
- As a political scientist, Machiavelli emphasizes that occasional need for the methodical exercise of brute force or deceit.

THE END JUSTIFIES THE MEANS?

- What does machiavelli mean by the end justifies the means?
- Answer:
- Another important thing that goes hand and hand with the greater good is the saying that "The end justifies the means" in other words

- "At the beginning of an action I might not be able to determine whether that action is morally right or wrong,
- but when the morally right goal is successfully achieved,
- then the steps which led to it must be morally right too.
- "I shall do a minor evil to achieve a greater good." Or "My aim for greater good makes all the evils I have done right."

VIOLENCE AND FORCE

- Violence may be necessary for the successful stabilisation of power and introduction of new legal institutions.
- Force may be used to eliminate political rivals, to coerce resistant populations, and to purge the community of other men strong enough of character to rule, who will inevitably attempt to replace the ruler.

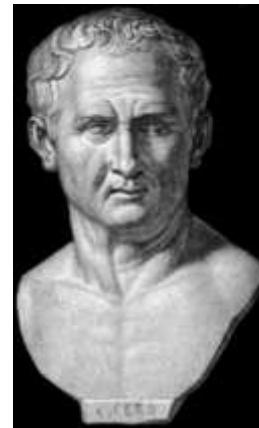

INFAMOUS

- Machiavelli has become infamous for such political advice, ensuring that he would be remembered in history through the adjective, "Machiavellian".

Salus populi suprema lex esto

KAPITALISME

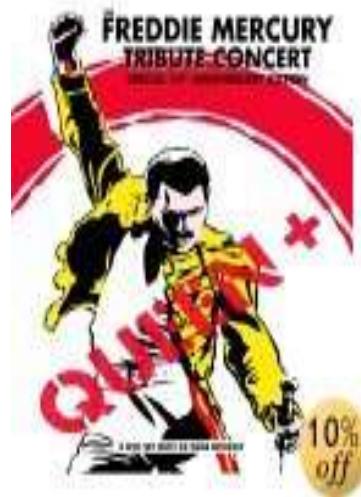

KAPITALISME

- ◉ Kapitalisme yang secara ontologis memuat persaingan individual menimbulkan adanya “kebutuhan”(need) yang perlu dipenuhi, yang berbatas (limited), tetapi juga memunculkan “keinginan” (desire) yang tak berbatas (un-limited/The sky is the limit).
- ◉ keinginan yang tak berbatas itu, lalu terjadilah fenomena yang disebut “ketamakan/keserakahan” (greed).

KAPITALISME

- Persaingan yang merupakan hakekat ontologis dari Kapitalisme, lalu akan melahirkan mereka-mereka yang menjadi “pemenang”, tetapi juga mereka yang harus dan terpaksa menjadi “pecundang”.

- We are the champions

- ◉ Populisme disini dimaksudkan suatu faham yang mendahulukan kepentingan rakyat kecil, “Put people first” .
- ◉ Populism is a political ideology or rhetorical style that holds that the common person is oppressed by the "elite" in society, which exists only to serve its own interests, and therefore, the instruments of the State need to be grasped from this self-serving elite and instead used for the benefit and advancement of the people as a whole. A populist reaches out to ordinary people, talking about their economic and social concerns, and appeals to their common sense.(word Iq.com)
